

The Cat® C4.4 Industrial Power Unit is offered in ratings ranging from 74.5-129.4 bkW (100-173.5 bhp) @ 2200 rpm, which meet U.S. EPA Tier 4 Final, EU Stage IV emission standards. Tier 4 Interim Equivalent and Stage IIIB Equivalent ratings are also available using Flex options. Conveniently pre-configured for a wide range of applications, the Cat® Industrial Power Unit is a complete power package containing a radiator, flywheel, alternator and alternator wiring completely pre-assembled for fast, straightforward installation in a number of OEM, customer and packager applications. These fuel efficient units are ready made for irrigation, industrial, mining and other pump applications.

# **Specifications**

Power Rating		
Maximum Power	129.4 kW	173.5 HP
Maximum Torque	750 Nm @ 1400 rpm	553.2 lb-ft @ 1400 rpm
Rated Speed		2200 rpm
Minimum Power	74.5 kW	100 HP

Emission Standards	
Emissions	U.S. EPA Tier 4 Final

General		
Engine Configuration	Inline 4, 4-Stroke-Cycle Diesel	
Bore	105 mm 4.1 in	
Stroke	127 mm 5 in	
Displacement	4.4 I 268.5 in <sup>3</sup>	
Compression Ratio	16.0:2	
Aspiration	Turbocharged Aftercooled (TA) or Twin Turbocharged Aftercooled (TTA)	
Rotation from Flywheel End	Counterclockwise	
Aftertreatment	DOC+DPF+SCR	

Power Unit Dimensions		
Length	1433 mm	56.4 in
Width	820 mm	32.3 in
Height	1150 mm	45.3 in
Weight	700 kg	1543 lb

# **Aftertreatment Dimensions**

Width	695 mm	27.4 in
Height	430 mm	16.9 in
Diameter	270 mm	10.6 in
Weight	80 kg	176 lb

## **Benefits and Features**

## Reliable, Quiet and Durable Power

World-class manufacturing capability and processes coupled with proven core engine designs assure reliability, quiet operation, and many hours of productive life.

### **High Performance**

Series turbocharging with smart wastegate available on specific ratings for fast response, high power, and increased torque.

### **Fuel Efficiency**

Fuel consumption optimized to match operating cycles of a wide range of equipment and applications while maintaining low operating costs.

### Fuel & Oil

Tier 4 Interim or Tier 4 Final, Stage IIIB or Stage IV engines require Ultra Low Sulfur Diesel (ULSD) fuel containing a maximum of 15 ppm sulfur, and new oil formulations to support the new technology. Cat® engines are designed to accommodate B20 biofuel. Your Cat dealer can provide more information regarding fuel and oil.

### **Broad Application Range**

Industry leading range of factory configurable ratings and options for agricultural, material handling, construction, mining, aircraft ground support, and other industrial applications.

### Package Size

Ideal for equipment with narrow engine compartments. Multiple installation options minimize total package size.

# World-class Product Support Offered Through Global Cat Dealer Network

- Scheduled maintenance, including SOSSM sample
- Customer Support Agreements (CSA)
- Caterpillar Extended Service Coverage (ESC)
- Superior dealer service network
- Extended dealer service network through the Cat Industrial Service Distributor (ISD) program

### Tier 4 Final, Stage IV Aftertreatment Features

**Regeneration.** The DOC/SCR modular design offers a simple, compact package while providing high levels of performance. A DOC/DPF/SCR option is available for higher power machines. While in use, both DOC/SCR an DOC/DPF/SCR systems offer transparent operation to the user. **Mounting.** Extensive range of inlets and outlets, as well as remote and on-engine installations, provide flexibility for many installations. **Service.** Both DOC/SCR an DOC/DPF/SCR systems are service-free for the emissions life of the engine.

# Standard Equipment

### Air Inlet System

Standard air cleaners

# **Control System**

 Full electronic control system, all connectors and wiring looms waterproof and designed to withstand harsh offhighway environments

# Cat® C4.4 ACERT™ Industrial Power Unit

## Industrial

• Flexible and configurable software features and well-supported SAE J1939 CAN bus enables highly integrated machines

## **Cooling System**

- Top tank temperature 108° C (226° F) as standard to minimize cooling pack size
- 50:50 water glycol mix
- · Guidance on cooling system design available through your dealer to ensure equipment reliability

### Flywheels and Flywheel Housing

· Wide choice of drivetrain interfaces, including SAE No. 2 and SAE No. 3 configurations

# **Fuel System**

- · Electronic high pressure common rail
- ACERT™ Technology
- Innovative filter design to ensure maximum protection of the engine

## **Lube System**

· Wide choice of sumps for different applications

### **Power Take Off**

SAE A and SAE B flanges on left-hand side. Additional SAE A flange available on left-hand side. Engine power
can also be taken from the front of the engine on some applications. Factory fitted compressors are also
available.

#### General

- · Available with or without a balancer
- · Paint: Caterpillar yellow, with optional colors available at request

### U.S. EPA Tier 4 Final, EU Stage IV Aftertreatment / Clean Emissions Control Equipment

- Diesel Oxidation Catalyst (DOC) / Selective Catalytic Reduction (SCR)
- Diesel Particulate Filter (DPF) / Selective Catalytic Reduction (SCR)

# U.S. EPA Tier 4 Interim, EU Stage IIIB Aftertreatment / Clean Emissions Control Equipment

- Clean Emissions Module (CEM), consisting of Diesel Particulate Filter (DPF) and Diesel Oxidation Catalyst (DOC)
- No ash service requirement
- · Passive regeneration
